

The 'Every Body'

Gender Expression

How a person presents their gender. This can include appearance, name, pronoun and social behaviour.

Gender Identity

A person's internal sense of identity as woman, man, both, fluid among genders or no gender, regardless of their sex assigned at birth.

Sexual Orientation

A person's emotional, physical and/or sexual attraction to others. It can change and may or may not be the same as a person's sexual behaviors.

Sex

Categories (male, female) to which people are typically assigned at birth based on physical characteristics (e.g. genitals). Some people may be assigned intersex, when their reproductive, sexual or genetic biology doesn't fit the traditional definitions of male or female.
