

# The 'Every Body'

## Gender Expression

How a person presents their gender. This can include appearance, name, pronoun and social behavior.

## Gender Identity

A person's internal sense of identity as female, male, both or neither, regardless of their sex assigned at birth.

## Sexual Orientation

A person's emotional and sexual attraction to other people. It can be fluid and may or may not reflect sexual behaviors.

## Sex

Categories (male, female) to which people are typically assigned at birth based on physical characteristics (e.g. genitals). Some people may be assigned intersex, when their reproductive, sexual or genetic biology doesn't fit the traditional definitions of male or female.
